

Long Term Care Insurance

Applying is as easy as A-B-C!

A. Gather this Information to Complete your Application

Your Primary Physician's Information:

- Your primary physician's name, address, city, state, ZIP and phone number
- The date of your last visit to your primary physician (month and year only)

The following information is needed from the last three years:

- Information for conditions medically diagnosed/treated
- Names, dosage and reason for taking any prescription medication(s)
- Dates and reasons for hospital or rehabilitation center confinement
- Contact information for physicians seen other than your primary physician

B. Complete your Application Online

To get a quote or to apply, go to www.YourLifeSecure.com. Click on the "Groups and Associations" purple box in the bottom-right corner. Enter your Group Number and click "Submit".

Enter Utah State University Alumni Association Group Number: 00143

The entire application process generally takes about 20–30 minutes. The first few sections ask for your health and demographic information. Next, you will select your coverage options and authorize payroll deductions for the premium amount. The last few sections of the application require you to acknowledge that you have read and reviewed certain information within the application.

C. After Submitting your Application

Once your application has been submitted online, it will be reviewed by LifeSecure's underwriting staff for consideration. In some cases, the underwriters may require additional information, including records from your physician(s). If you are approved for any rate class other than preferred, you will be contacted before the policy is issued to verify your acceptance of the premium. If approved, you will receive a Welcome Package containing your Policy and other useful information.

To check on the status of your application at any time, please visit: www.YourLifeSecure.com, click on the "Groups & Association" purple box. Enter the user name and password created during your application process.
