Above Average		Average		Poor
5	4	3	2	1
14%	60%	19%	4%	2%

Comments:

I would like to see more opportunities for art/art history master programs
 I got the questions I needed answered! Thank you for holding this fair
 This fair helped out a lot with choices of schools that I didn't know about before
 Nobody was at their booth
 Very Helpful
 Lots of booths representing D.D. Schools
 The MPP were very helpful
 I visited during the morning (after 9:30) and a lot of them still were not there
 I didn't find useful information to be because there were no statistics programs
 Very friendly, Only a few schools
 Few law schools represented, and difficult to find good helpful information was presented
 Very knowledgeable, answered my questions
 Good selection
 Some schools were very informative - other not so much
 Little to no info about my desired program (wildlife)
 They are willing to talk
 I wasn't left with questions and am very excited to apply
 I tried twice to come see the people from Law schools; the first time, neither BYU nor Utah were here, 2nd Utah wasn't there.

What Additional Graduate Schools or programs would you like to see invited to future fairs?

More Economics Master

More MBA

art/art history

Sciences focusing on Research rather than medical, nursing, or dental

History, Spanish, education

Aerospace Engineering Schools not in Utah

Hopefully I won't need to attend any other graduate fairs

Bio-tech

More prestigious schools

Masters programs for math

Stanford, more well known schools

More aerospace engineering

None

Environmental Engineering

None, there were more than I thought were going to be

Georgia Tech, MIT, Stanford

Northern Arizona - PHD programs

Not sure, good selection. Maybe schools outside of the West.

Coastal schools - CA, MIT - some father away

MIT, Harvard, some not so close to Utah

Management Info Systems

Speech Pathology

English, theatre

University of Delaware, various History program types

More law schools

Texas A&M

North Texas University Behavioral Psych program

B.D. Programs

Sciences like geology/geophysics

More law schools

History

More environmental based programs such as sustainability

Not very much in Chemistry

PhD - Political Science

South Carolina, Illinois, Michigan

What Additional Graduate Schools or programs would you like to see invited to future fairs? Cont.

Mfdex, Yale

Stanford

More Ag Programs

Where was the natural resources or college of Ag from USU?

Meteorology

If possible more California schools, more economics/political science

Anthropology - cultural, no programs here today

West Minister, more MBA Schools

No other ones. There were lots and lots

I would like to see more statistics programs

More psychology programs

U of I, OSU

I hope to see that there are more top ranking schools to come and represent in the future

More law schools (UCLA, Stanford, Berkley, etc.)

More law schools

More engineering schools

Law firms

I found several unexpected opportunities

Oregon State, More natural resources programs

Additional states would be nice. Arizona State University would be my suggestion but just because that is where I am looking

Boise State

More Business

Oregon Universities

Wildlife programs from Washington State, UofIdaho, Colorado State, Montana State

I am interested in business and there are plenty of schools in attendance that include that so I can't think of any others.

I don't know. I still have time!

Education

More MBAs, maybe from Eastern Schools

More Psy Programs

Harvard

More law schools

UofU Social Work

All 9 Podiatry Schools

More biology PhD Schools! There was only 1 this year.

Other law schools

What other suggestions do you have for improving the Graduate School Fair?

Better advertising

More regional diversity of schools more than 1 from the East coast

Invite more law schools

More bigger name schools

Put similar programs in same area of room. Ex. MBA's, engineering, Nursing

Food-crab, ribs, spicy chicken

Leave schedule of when reps will be there. 1/2 the people I wanted to talk to weren't there

On the posters of each booth, provide a big obvious sign of which bachelors degrees the program recruits so it's easy to see if it's something for you.

Last longer

None, very informative

You do a great job

None I can think, well done

More engineering if

Good

None

More schools with more variety of majors

More variety with schools, less engineering/business

More agricultural programs, we are the land grant institution of Utah!

Put the programs in sections such as medical, engineering, business. Not mixed

Invite more schools! Have each rep. Bring an information request form for more than their particular department

Division of Distance learning programs

All good, I loved it

Group by University

More USU support! All college represent!

People staying at booths

More candy and cooler pens

More variety, there was a lot of departments from of U of U and USU, we need variety

Looks great need more schools

What other suggestions do you have for improving the Graduate School Fair? Cont.

You all were great!

The map seemed to be a little confusing

It was really good maybe just more variety in schools

More synopsis of the schools in the map would be nice; including location, and all programs offered

Better organized brochure

It was fine!

Make it more well known

Group the degrees together

I was confused by the map at first

Organize different programs into sects grouped together. i.e. law section, medical section...

Try extending it to later in the afternoon & have teachers announce in class the date and time of the grad fair

It overall was good

None it was very informational

Looks great!
