## Student\* Evaluations and Comments

---

---

### Comments:

- More biological engineering companies
- Need more math opportunities.
- Needs bigger national companies, Ford, GM, etc.
- Needs to attract more electrical engineering firms.
- I know it's hard with so many people, but it's hot in here.
- I cam looking to talk to 4-5 employers. I wound up talking to many more. I feel like it was a very productive evening with a lot of good networking that would have taken much more time and effort otherwise.
- I would be good if it were more clear on how to know where the offices were located before talking to the companies.
- It really helps when you have a degree.
- Great job! Please keep it up because next year I'll really be needing a job.
- Good selection this year, I liked it.
- Great!
- I wish I were graduating
- Thanks
- Thanks for the hard work!
- It's a good feeling to meet and interact with companies before graduating in person so that we get to know more.
- The tech expo was nice and I came to what employers want from you
- It is always so sad when they cancel. Where was Lockheed, Raytheon?
- It was great!
- I wish that recruiters made it more obvious as to what type of projects they work on through their displays.
- I'm disappointed that some large companies weren't here; Lockheed, Northrup...
