## Student\* Evaluations and Comments

### Comments:

It was great, great for networking and getting your resume out there.

Don't have it so late in the afternoon

Lots of good opportunities are available that I ha not considered. Will definitely come to others

More variety from other parts of US

Awesome

Wish more stayed for interviews

Good Experience

Companies only hire locally, lack of information, sometimes only HR guys, "go to website"

Good work

Found the companies I wanted to talk to

I'm glad that people were hiring, not just advertising

More Companies!!

I was able to talk with great employers about internship opportunities. Just what I needed!

All is just for Engineers or Comp, Science.

The companies I wanted to work for came - very good group of employees

There were a lot more MIS/BIS businesses

Very informative

It was very good. To make it better make a list of who is looking for what type of Engineers

I was well informed on the event and prepared to present myself at the fair

Not enough Biological Engineering opportunities, but cool stuff!

There was a lot of resume hype, but most employers wanted resumes submitted online

Not enough info online

Met a lot of people, it is good source for networking and getting a job

I was able to get a lot of contacts and learn a little more about the Job field

I would like to see more companies that recruit people majoring in Computer Engineering

See if you can get Xilinx or Altera

It possible spread things out a little

This is the second year that Applies Signal Technology didn't show!

More companies hiring software engineers are needed

Need more MIS internships!

Very good. A lot of good information

Ball - gave a good overview of what a resume should be

I like free candy

Thanks for the heads up and letting me know which businesses involved my major

I received a email that said that these companies are look for business majors, however, some companies actually weren't looking for business at all

Thanks

## Student\* Evaluations and Comments

### Comments Cont.:

Great mix of companies

Too crowded, need more room

There weren't as many structural engineering companies this time

I would of liked some way

It was very well organized

Always a great event! Got some interviews!

To crowded

The map could be better

Most companies were looking for strictly engineering

There seemed to be fewer companies this year. I was esp. looking for Orbital and Northrop. Grumman

Most/all were engineering positions which was a turn off

Most were ME/EE positions No MIS companies

Could use a bigger room was very crowded

It was really good, it would be nice to have more Biological Engineering companies

The only thing I disliked was being shunned when my major had nothing to do with their company, but the rest where way open and friendly

Most of the firms don't have current openings

Far better than the Graduate fair

Excellent opportunities for the EE and CMPE

Love the later afternoon time. Preparation recommendations were very helpful

It was interesting and helpful. I will definitely be coming the next 4 years

You should have the engineering professors announce when these things happen. This was awesome, try to get more Mechanical/car auto

I enjoyed meeting with the companies. They were very enthusiastic about their jobs

Vey helpful at what companies are actually looking for

Very informative

It would be nice if there were more employers for Bioinformatics
