

Anthropology, MS

Specialization(s): Archeology and Cultural Resource Management

Department: Sociology, Social Work and Anthropology Department

College: College of Humanities and Social Sciences

Overview

About This Degree

The Department of Sociology, Social Work and Anthropology offers an MS degree in anthropology with a required specialization in archaeology and cultural resource management. Cultural resource management (CRM) archaeology provides industry and government agencies with an evaluation of heritage resources that, by law, have to be taken into account prior to the alteration of public landscapes. CRM is now an institutionalized element of the environmental management industry in the United States and many other countries. The program at USU was created in response to an expressed need for graduates qualified for management in cultural resource management, so students receive specific training for this career industry.

Anthropology at USU is specifically designed to provide the training and degree qualifications sought after by employers in both public and private sectors. The graduate program in anthropology at Utah State University responds to the changing needs of archaeology and to recommendations of archaeologists in the CRM industry. The master's degree will also prepare students intending to pursue a doctoral degree at other institutions.

A [museum studies certificate](#) is also available and is a popular choice for those interested in developing the skills needed for various careers in museums.

Career Options

Nationwide the CRM industry is valued at several billion dollars per year. Graduates may find careers in the following fields:

- Private contract firms
- Federal, state, and local contracts
- Land management agencies for all public land, such as park services
- Museums
- Academia

What it takes

Admissions Requirements

The department will consider applications from students with undergraduate degrees in subjects other than anthropology. Acceptance in these cases may require fulfilling certain course prerequisites.

Application Requirements:

- Complete the [online application](#)
- Pay the \$55 application fee
- Score at or above the 40th percentile on the GRE
- Have a 3.0 or higher GPA on your last 60 semester or 90 quarter credits
- Provide transcripts of all college/university credits
- Provide three contacts for letters of recommendation

International students have [additional admissions requirements](#).

Admissions Deadlines

The department has the following deadline:

- Fall Semester – February 1

Master's Degree Plan Options

Students can receive the MS by pursuing one of two options:

- In the **Plan A** option, students complete graduate-level coursework and must write a thesis.
- The **Plan B** option requires the production of a paper or creative work of art and is expected to reflect equivalent scholarship standards as a thesis.

Financial Assistance

Some financial assistance is available in the form of graduate [assistantships](#). These funds are distributed through a competitive process, based on student qualifications, performance, and interests. Contact the department to see what is currently available.

A variety of additional funding opportunities are available, including [fellowships](#), [scholarships](#), [tuition awards](#), and [travel support](#). Additionally, students may be eligible for subsidized [health insurance](#) through qualifying assistantships.

Program Requirements

[Click here](#) to see course requirements for the **Master of Science**.

Students must complete at least one of the following requirements:

- An internship of three credits. Students are placed with internships through the department's contacts; usually local agencies.
- Field experience in archaeology. Students may use previous field experiences, or participate in the department's optional field school, which is offered every summer and typically lasts six to eight weeks, full time. It is offered in different locations each year.

Chris Morgan

Assistant Professor

Office: Main 245 C

Phone: (435) 797-1178

Email: chris.morgan@usu.edu

Faculty

Molly Boeka Cannon, ABD, University of Nebraska

Associate Professor

Area: Human-Environment Interactions, Geophysical Prospecting and Archaeology, Method and Theory in Anthropology, Scientific Visualization, Cartography, Geographic Information Science (GIScience), History of Scientific Thought, Alternative Teaching Methods, Engaging Students in the Learning Process

Office: MAIN 245 A

Phone: (435) 797-1496

Email: molly.cannon@usu.edu

Kenneth Cannon, PhD, University of Nebraska

Assistant Adjunct Professor

Area: Hunter-gatherers, mammal biogeography, cultural resource management; Great Plains, Intermountain West, Rocky Mountains

Office: MAIN 240 B

Phone: (435) 797- 3868

Email: kenneth.cannon@usu.edu

Richley Crapo, PhD, University of Utah

Professor

Area: Religion, sex, gender, sexuality, and homosexuality

Office: MAIN 245 B

Phone: (435) 797-1080

Email: richley.crapo@usu.edu

Bonnie Glass-Coffin, PhD, University of California - Los Angeles

Assistant Professor

Area: Medical anthropology, shamanism

Office: MAIN 245 E

Phone: (435) 797-4064

Email: bonnie.glasscoffin@usu.edu

Emily Jones, PhD, University of Washington

Assistant Professor

Area: Human-environment interactions, zooarchaeology, indigenous archeology, European Paleolithic

Office: USU Brigham City campus

Phone: (435) 734-2277

Email: emily.jones@usu.edu

Patricia Lambert, PhD, University of California - Santa Barbara

Professor

Area: Biological anthropology, bioarchaeology, paleopahtology

Office: MAIN 245 F

Phone: (435) 797-2603

Email: patricia.lambert@usu.edu

David Lancy, PhD, University of Pittsburgh

Professor

Area: Education anthropology, ethnography

Office: MAIN 245 D

Phone: (435) 797-1322

Email: david.lancy@usu.edu

Chris Morgan, PhD, University of California - Davis

Assistant Professor

Area: Archaeology, evolutionary ecology, human origins and agriculture in China, GIS

Office: Main 245 C

Phone: (435) 797-1178

Email: chris.morgan@usu.edu

Steven Simms, PhD, University of Utah

Professor, Graduate Program Director

Area: Archaeology, anthropological theory, behavioral ecology

Office: MAIN 245 G

Phone: (435) 797-1277

Email: s.simms@usu.edu

Get Involved

Professional Organizations, Honor Societies, and Clubs

The Society for American Archaeology: SAA is an international organization dedicated to the research, interpretation, and protection of the archaeological heritage of the Americas. With more than 7,000 members, the society represents professionals, students, and archaeologists working in a variety of settings including government agencies, colleges and universities, museums, and the private sector.

Students are also encouraged to become members of local anthropological or archaeological organizations depending on where they live and work once they have graduated.

Labs, Centers, Research

Archaeological Laboratory: This laboratory provides a professional context for university students to acquire experience with archaeological documentation, testing, and evaluation of cultural resources. The archaeology research program teaches students how to interpret research and preserve artifacts of all kinds for the public and create an enduring record of cultural heritage from around the world.

Museum of Anthropology: USU houses the Museum of Anthropology, which provides a professional context for university students to acquire experience in museum operation and management. The museum collects artifacts of all kinds, from prehistoric stone tools to Roman coins to Middle Eastern Rugs, to preserve for the public an enduring record of cultural heritage from around the world.

Osteology Laboratory: This laboratory provides a learning environment for university students to study human bones. In the lab, students learn to identify human bones from animal bones, conduct quantitative, statistical research, and learn about the laws and ethics pertaining to human remains.

Spatial Analysis and Visualization Laboratory: This lab provides cutting-edge spatial data acquisition and analysis tools for archaeologists. These include state-of-the-art GPS, GIS, remote sensing, scanning, photographic and microscopy hardware, and the software necessary for performing quantitative, statistical, and geospatial interpretation of collected data.

USU Archeological Services: USUAS is a private company that was launched by USU archaeologists. It specializes in the documentation, testing, and evaluation of cultural resources. The organization works with a number of agencies to provide consultation and deliverables in the cultural resource field. Undergrads and graduate students often work in paid positions at USUAS.
