UWRL 04/07/15

Facilities Attendees: Dave, Randi, Linda, Glynn, Rob

Building Attendees: Mac Mckee, Jan Urroz

1- Have replaced two air-handlers and they have 5 and wondering about the other 3. Dave will find the status and let Jan know.

2- Parking lot pot hole repair.

3- Bridge and concrete next to the bridge have some rusting rebar starting to show up and getting worse. Ask Ben about the issue. Let Jan know.

4- Expressed frustration over the whole fume hood and fire alarm issue. Its been taken care of but they were frustrated with the approach to fix it.

They did have a test in December and seemed to all work like it should. Dave will talk to Howard about the status to insure that everything is functioning like it should. Have the fume hoods been labeled correctly in metasys.

5- They really appreciate customer service and the positive interaction. They also really appreciate the excellent custodial service. Brent does a great job, better than anyone before. Feel like they have a good relationship with most of the trades. Painters are very curtious with not disturbing occupants.

6- They do have some dead trees they would e to have removed. Especially the one located directly east of the meeting room. Have LOAM come talk with Jan.

7- They are excited to have some lighting upgrades to save energy. Glynn is working on.

8- They are generally very happy with things and it's a lot better than it used to be.
