Morris D. Whitaker, International Program Development

International Education

The Office of International Affairs is responsible for developing and implementing a wide variety of international education policies and

activities at USU. The Vice Provost oversees the Office of International Students and Scholars, as well as the Study Abroad Office. He also serves as an institutional liaison for international education projects, the International Studies major and minor, Title VI program development, and international agreements and memoranda of understanding. The Vice Provost also works directly with University colleges and departments on international dimensions of teaching, research, and extension education. International Affairs is involved with entrepreneurial efforts to provide the resources necessary to support its mission and seeks to be a catalyst to help USU become a premier international university.

International Program Development

Director: Morris D. Whitaker

The Office of International Affairs provides technical support and assists faculty members interested in implementing collaborative international development projects around the globe. As a land-grant university, USU has long been involved in providing technical assistance and training to various countries around the world. Since the early 1950s, USU has implemented more than 125 major international technical assistance and training projects having a combined value of more than US\$150 million. Much of USU's experience and development has made the University an international leader in the areas associated with irrigation and water resources; arid-land agriculture; livestock production on rangelands; dairy production and processing; management of natural resources; institutional building in research, extension, and education; and planning and implementation of skills development programs.
