

HOW WE USE THE PRESENTATION EVALUATIONS

Presentation evaluations are used in specific ways. Once the information is typed up, it is reviewed by the presenter and a copy is sent to the point of contact for that particular presentation group. Different classes have different needs.

Recommendations made on evaluations specific to that class are looked at and taken into consideration the next time a presentation is done in that particular class. Recommendations that can be applied to all groups are looked at and implemented for effectiveness in all presentations. Overall ratings have been very good and few changes have been needed.
