

# POLICY MANUAL

## OPERATING POLICIES AND PROCEDURES

---

**Number 514**

**Subject: Vehicle Use Policy**

**Effective Date: February 1, 2006**

---

### 514.1 USE OF UNIVERSITY VEHICLES

1.1 All use of vehicles whether owned, leased, rented, or otherwise made available for use by Utah State University (University vehicles) must be authorized by a Department Head, Director, Dean or Vice President. Owned or leased vehicles must be documented as part of the University Fleet and maintained in the state-wide Fleet database. Departments must not exceed the existing number of vehicles allocated to their department unit.

1.2 University vehicles may only be used:

(1) for authorized University purposes; or

(2) by authorized student organizations (a) registered under Article IV, Section 2, of the Code of Policies and Procedures for Students at Utah State University, (b) registered as a USU club sport with the Campus Recreation Office, or (c) exempt from registration under Article IV, Section 3, of the Code of Policies and Procedures for Students at Utah State University.

1.3 Drivers of University vehicles must be at least 18 years old and have a valid drivers license.

1.4 Drivers of University vehicles must have a driving record free of the following citations occurring within the past twelve (12) months:

(1) any moving violation involving an accident, unless the drivers have completed an approved driving course subsequent to receiving each moving violation citation;

(2) reckless driving; or

(3) driving under the influence of alcohol or drugs.

1.5 Drivers of University vehicles must complete an approved Driver Safety Program every three years. In the event of a moving violation citation or accident in a University vehicle, the Driver Safety Program must be retaken prior to driving a University vehicle again.

1.6 All employees who regularly operate vehicles as a designated part of their job must complete an approved Driver Safety Program at initial employment and annually thereafter.

1.7 It is the responsibility of each Department Head/Director to ensure that all employees who drive vehicles are up-to-date with the above Driver Safety Program. Departments are required to keep a copy of the completed Driver's test for each employee and to forward a copy to the Motor Pool in order to update the Fleet Management database.

1.8 Proof of adequate insurance is required from the owner for vehicles that are owned by another organization and loaned to the University for use. Departments should contact the USU Risk Management Office regarding this process.

#### 514.2 VEHICLE OPERATION STANDARDS

2.1 Drivers of University vehicles must observe all state and local laws, including those stated in Utah Code Annotated 1953, as amended, Title 42, Chapter 6 (Traffic Rules and Regulations).

2.2 Drivers and all occupants **must** wear a seatbelt at all times and observe all posted speed limits including reduced speed construction zones and road hazard warnings. All seatbelts need to be fastened before the vehicle is put in motion.

2.3 Drivers should briefly rest from driving every 2 hours.

2.4 Total driving time must not exceed 12 hours per day, irrespective of the number of drivers.

2.5 University vehicles must not be operated for travel purposes between 11:00 p.m. and 5:00 a.m., except where the trip (a) is solely to return to a home base and (b) the return trip is less than 4 hours in duration.

2.6 Drivers must review weather conditions in advance of the trip and make prudent travel adjustments when necessary. Travel plans should allow for emergency stop-overs and associated expenses due to bad weather. Drivers must slow down if adverse weather conditions exist. Travel should not proceed in extreme weather conditions.

2.7 Drivers are responsible for the safe operation and condition of the vehicle they are driving and should be familiar with the vehicle safety equipment. Vehicle problems or concerns should be promptly reported to: (a) Motor Pool if the vehicle is a Motor Pool vehicle or (b) Department Head/Director if the vehicle is a departmental vehicle.

2.8 A Passenger Manifest Form must be filed for all trips beyond a 10 mile radius of the home station of the vehicle. The form includes trip dates, destination, vehicle used and names and emergency contact numbers for all occupants. Departments are responsible to maintain a copy of the Passenger Manifest Form for one month after the trip is completed for departmental vehicles. Motor Pool will maintain records for vehicles rented from the Motor Pool fleet.

2.9 Towing is not allowed for sedans, minivans, or SUV's with a gross vehicle weight rating (GVWR) less than 8,000 lbs. Towing or loading (including passengers) should not exceed the manufacturer's capacity limits. Adding storage or luggage racks above any vehicle is not allowed.

#### 514.3 FULL SIZE VANS

3.1 Use of 12 or 15 passenger vans is prohibited with the following two exceptions. (These exceptions apply when traveling from an origin point remote to the USU Campus location.)

(1) In rare circumstances where no other suitable transportation is available, a Dean, Vice President, or the Athletic Director may approve the use of a full-size passenger van. However, in such circumstances, driver's must meet the certification requirements as outlined in section 4.3(2) and vehicle capacity is limited to nine (9) occupants.

(2) In the event that transportation is provided by a hosting organization using 12 or 15 passenger vans (e.g. airport-hotel shuttle, conference events, etc.), University employees may accept the transportation or arrange alternate transportation at their own discretion.

3.2 As an alternative to 12 and 15 passenger vans, 15 passenger buses will be available from the Motor Pool. These vehicles will have dual rear wheels and meet Federal school bus standards. Additional conditions and training requirements apply as outlined in section 4.3.

3.3 Full-size vans used for cargo purposes only may continue to be purchased and used by departments where the wheelbase does not exceed 139" (no extended body vans) and seating capacity is limited to two passengers. Continued use of existing cargo vans with a wheelbase greater than 139" will be limited to a 10 mile radius of the USU Campus location and will be phased out as vehicles are replaced. Driver's must meet the certification requirements as outlined in section 4.3(2).

#### 514.4 VEHICLE CAPACITIES AND ADDITIONAL TRAINING REQUIREMENTS

4.1 Departments may own or lease vehicles with a seating capacity of seven (7) occupants or less.

4.2 In order to ensure consistent maintenance and complete vehicle history, all vehicles with seating capacity greater than seven (7) occupants will be managed and maintained by the Motor Pool and made available for use by departments with properly trained drivers as outlined in section 4.3.

4.3 In addition to meeting all general conditions specified in sections 514.1--514.2, drivers of vehicles with seating capacity greater than seven (7) occupants must:

(1) be at least twenty-one (21) years old.

(2) have satisfactorily completed the National Safety Council (NSC) driver certification course as approved by the Manager of Fleet Operations on an annual basis; or, have a current Commercial Drivers License (CDL) with a passenger endorsement in which case the approved (NSC) safety course must be taken every other year.

(3) take sufficient time before each trip (and on a daily basis thereafter) to become familiar with all operations of the vehicle including cruise control and to perform a pre-trip inspection on the vehicle to ensure proper tire inflation, correct fluid levels, and brake operation as well as safety and other operational features of the vehicle.

(4) ensure that cargo does not exceed physical limits imposed by the Motor Pool and that the spare tire and all cargo is safely secured in the cargo area of the vehicle and that the vehicle is not overloaded with passengers or exceeds rated weight capacity limits.

(5) insist on the use of seatbelts by all passengers and observe all traffic rules including slower driving under difficult or adverse conditions. All seatbelts need to be fastened before the vehicle is put in motion.

4.4 For short term rentals, a sedan or minivan is recommended. However, an SUV may also be rented with a maximum of eight (8) occupants.

#### 514.5 RESPONSIBILITIES AND SANCTIONS

The privilege to use University vehicles, by individuals or units/organizations or both, may be withdrawn for up to one year for violations of the Vehicle Use Policy.

5.1 It is the responsibility of each Department Head/Director to ensure the safe operation and condition of departmental vehicles including regular maintenance and safety inspections. Departments must coordinate with the Motor Pool to perform the work or make sure that all vehicle repair and maintenance is completed on schedule and that documentation is forwarded to the Motor Pool in a timely manner.

5.2 All vehicle safety inspections must be performed under the direction of the Motor Pool on an annual basis to ensure compliance to University maintenance standards. The Motor Pool is empowered to ground and remove from service any vehicle deemed unsafe until appropriate repairs are made or the vehicle is replaced.

5.3 Drivers of University vehicles are empowered to insist that the vehicle they are driving is safe and operational for the intended purpose of the trip. Drivers may refuse to drive any vehicle they deem to be unsafe until appropriate action takes place to correct the noted problems.

5.4 The Risk Control Committee will review and assess updated test results from the National Highway Traffic Safety Administration (NHTSA), the Insurance Institute for Highway Safety (IIHS), and other appropriate sources. The Committee will establish and maintain an on-going list of vehicles that meet acceptable safety standards. Proposed vehicle purchases will be reviewed by the Manager of Fleet Operations to verify that selected vehicles are on the approved vehicle list.
