Yurt Policies and Procedures

These policies and procedures have been prepared to provide you with important background and safety information concerning the USU OP yurt. It is essential that you and all members of your group read through this information before embarking on a tour to the yurt. As you read through this handout, please make a careful and honest evaluation of your group’s abilities.

This yurt was purchased and continuously maintained by student fees. Because of this USU students have preference for weekends (this is when historically students have used the yurt the most. On those dates at least 50% of your group must be current USU students. As a USU facility, the yurt is managed as any other university property, including the prohibition of alcohol and un-prescribed medications or illicit drugs.

Violations of policies will result in the loss of access to the yurt by the offenders and in the case of students they will be reported to the student conduct officer for review.

About the Yurt

YURT CONTENTS

In the yurt you will find a wood stove for heat, a propane cooking stove, as well as eating and cooking utensils. Cooking utensils include a griddle, pots for boiling water, pans, large serving bowls, and a small coffee percolator. The instructions for use of the stoves are posted on the inside of the yurt door. You will also find bunk beds with sleeping bags and foam pads. You will be provided with a sleeping bag liner to take with you to the yurt.

YURT BATHROOM

There are NO FLUSH TOILETS OR RUNNING WATER AT THE YURTS. At Blind Hollow we use shallow pit toilets for solid human waste. To ensure that these toilets function properly, (less smell, more space) do not urinate or put toilet paper in the pit toilets. Urinate in the designated area and burn toilet paper in the wood stove.
PRE-TRIP MEETING AND YURT HOSTS

We ask that your entire group be at the OP shop for the pre-trip meeting with the Yurt Hosts at 5.30pm the night before your trip, the meeting will not last more than half an hour. While we would like the entire group to be present, only those representing the USU contingent of your group are REQUIRED to be there with valid USU ID (this is to verify your USU affiliation).

The yurt hosts will meet at least one member of your party at the trail head. Yurt hosts are responsible to do the following:

- Collect the completed “Assumption of Risk” forms at the pre-trip meeting and verify 50% of the group is USU affiliated
- Assess the condition of the yurt upon arrival so your group will not be held accountable for damage to the yurt from weather or prior groups.
- Assist the group in opening the yurt by:
  - Helping to clean snow off the yurt, toilet, and wood pile
  - Checking fuel quantities in the propane tanks, emergency lanterns, and firewood
- Cover operating procedures including drinking water and grey water disposal

After covering these procedures, the Host will leave your group at the yurt. You will be responsible to clean and close up the yurt as stated in the policies and procedures.

Group Size Limit

The OP must limit group sizes to nine people.
- The yurt is under a special use permit as a Zone 3 Area, which limits group sizes for minimal impact.
- The yurt has limited resources. Groups exceeding the size limit deplete firewood and fill the pit toilet too quickly.

Groups who violate size limits will be fined a minimum of $50 per person for each night of violation!
THINGS THAT DON'T BELONG AT THE YURT

- **ALCOHOL and illegal drugs** - The yurt is a university facility and as such these substances are not allowed
- **NO DOGS/PETS**
  Dogs are not allowed because the snow surrounding the yurt is melted for drinking water. Persons taking dogs to the yurt will be subject to a minimum $50 fine per dog, per night.
- **NO SNOWMOBILES**
  The yurt is located in areas designated by the U.S. Forest Service as Winter Non-motorized; there is no snowmobile access.
- **NO CAMPFIRES**
  Our special use permit from the U.S. Forest Service prohibits fires outside of the yurt stove. We can only cut firewood to heat the yurt. Outside fires endanger the permits, the future of the yurt and leave other groups in the cold when the wood runs out.

Safety

USING THE YURT IS INHERENTLY RISKY
Backcountry activity involves hazards. Hypothermia, inclement weather, snow, avalanches and freezing temperatures can threaten even the most experienced outdoor user. Activities ranging from simple day tours to skiing to a mountain peak can become life threatening due to the forces of nature or errors in judgment. Please be aware there are inherent risks involved with traveling to and from and staying at the yurt.

AVALANCHEs
For the current avalanche and mountain weather information, visit the Utah Avalanche Forecast Center website at [http://utahavalanchecenter.org/](http://utahavalanchecenter.org/). There are areas en route to and surrounding the yurt that have avalanched in the past. Please be prepared for avalanche conditions.

BE PREPARED FOR THE WORST
It is possible for the yurt to be damaged due to extreme weather conditions. High winds, heavy snowstorms, falling branches, and accumulation of snow on the yurt could cause the yurt to rip or collapse. It is also possible that items such as the wood stove, solar panel, cooking utensils etc. (examples of items that were removed without permission in the past) can be missing from the yurt because of vandals. For these reasons it is important that your group be well prepared. Be prepared to spend the night outside if necessary. We do our best to ensure that you do not encounter any of these problems. Nevertheless, please report any problems to the OP that you experience.
On the Trail

BEFORE YOU EMBARK ON A YURT TRIP

If you feel confident that you have the skills and knowledge to safely undertake a yurt trip, follow these guidelines:

• All members of your group claiming USU affiliation must attend the pre-trip meeting at the OP shop at 5.30pm the night before your trip to verify with USU ID.

• Have everyone read and sign the “Assumption of Risk” form. After everyone has signed it, make sure it is in the possession of the yurt host at the pre-trip meeting.

• Make sure everyone in your group is properly equipped for the trip.

• Before departing, always leave word with a friend or relative about where you are going and when you plan to return. If they are concerned about your return, the following numbers can be used to report any problems or emergencies concerning the yurt.

THE ROUTE TO THE YURT

The route is not marked. Two yurt hosts will be provided and at least one member of your party must go in with the hosts, however your entire party is encouraged to go in with the yurt hosts. Yurt hosts will travel with you, but they are not allowed to act as guides. Your party is responsible to get to the yurt under your own navigation. Please be prepared with a map, compass, and/or a GPS.

MAPS

The OP has maps for the yurt areas that show a basic route and provide GPS coordinates.

THE YURT IS HARD TO FIND

The yurt can be hard to find for a number of reasons including poor visibility from fog and falling snow. Snowpack around the yurt can exceed 10 feet. When dug out the yurt can be camouflaged behind piles of snow. The yurt is also located in trees that provide necessary wind protection but increase the difficulty of finding it.

We recommend that you first learn the location of the yurt by going on organized OP trips or by taking time to familiarize yourself with surrounding landmarks and to learn route-finding tricks that will help you locate the yurt on your own. There have been cases when individuals have been to the yurt several times and have not been able to locate the yurt on a later date.

WHEN TO START
At least one member of your party will start with the yurt hosts at 10 a.m. We recommend that you be on the trail no later than 9:00 or 10:00 a.m. Daylight is short in the winter, and you'll need to allow plenty of time. Once you arrive at the yurt, you'll also need time to dig out the yurt, woodpile and toilet.

DO NOT SEPARATE
While skiing or snowshoeing to the yurt, don't allow your group to become separated. This is extremely important in bad weather or poor visibility. Stay together and stay safe. Travel at a pace that is comfortable for the slowest member of the group. If one party member becomes exhausted, your entire group is weakened as a result. A slow but steady pace is a time-tested and safe way of traveling in the winter.

At the Yurt
There are some common procedures that will help make your stay safe and comfortable.

WOOD STOVE
The wood stove is used to heat the yurt and melt snow for drinking water. The stove works best with the stove door shut. Smoke will fill the yurt if the stove door is not kept closed at all times, with the exception of loading firewood. It is not a fireplace you will not get more heat out of the stove with the stove door open. Do not crank/load the stove until it glows red, which will damage the stove. Aim for a comfortable, but not hot, temperature in the yurt. Split logs outside the yurt, chopping wood inside damages the floor.

COOK STOVE
The propane cook stove is for cooking, not for melting snow. When the stove is not in use, turn the gas off at the tank to prevent gas leakage.

KITCHEN
Use wash and rinse pans for dishes. Add a cap of bleach to the rinse water. Strain grey water in designated area. Store clean dishes in dish box with the lid latched. Wipe down counters and tabletops with bleach water.

Checkout Procedures
A detailed checkout list picture book is located in the yurt. Please complete these tasks before leaving the yurt.
• Thoroughly clean out the yurt.
  o Sweep out dirt, wood chips, and snow with a broom.
  o Any small bits of garbage must be carried out.
• Pack out all garbage and food, including non-perishables and uneaten food scraps.
• Empty all water containers and place upside down.
• Move any flammables (paper, kindling) away from the wood stove.
• Make sure the toilet seat is closed and the tarp is secure over the toilet.
- Burn all used toilet paper in the wood stove.
- Replace enough firewood for one fire, do not load thy yurt with wood.
- Place anything that belongs in the yurt, like the shovel inside the yurt.
- Place the axe and maul, inside the woodshed.
- Securely fasten and lock the yurt door.
- Call 435-797-3264 if the yurt is in need of any supplies or repairs.
