

Preventive care

In-network services covered at 100%

Most Regence members have 100% coverage for preventive services—care that detects an issue before it becomes a problem. You'll pay nothing for the care listed here when you see an in-network provider. We follow recommendations from three government agencies to determine which services we cover.¹

You may have to pay for covered preventive care if:

- You see an out-of-network provider
- Your doctor provides preventive care outside the guidelines
- Your provider doesn't obtain any required pre-authorization (for example, physical therapy for fall prevention, genetic testing for BRCA 1 and 2 and lung cancer screening)

Also, diagnostic services are different from preventive. Diagnostic care looks at a problem you're already having. So ask your doctor if services are preventive or diagnostic. It's important to know because you may have to pay out of pocket for diagnostic care.

Check the list below to see which preventive services most of our plans cover. Some plans may have limitations or not cover all of these services. Check your plan benefits or call Customer Service at the number on the back of your member ID card if you have questions.

1. These scientifically supported guidelines are created by the United States Preventive Services Task Force (USPSTF), Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention (CDC), and Health Resources and Services Administration (HRSA).

Members of all ages
