

# HUNTSMAN *scholars*

John Ferguson & Shannon Peterson

## Blue Goes Green Grants

The Huntsman Scholar program will provide instruction, encouragement, and support for Scholars to apply for and enact Blue Goes Green Grants. Students will be introduced to thinking about sustainability problems on campus.

## Recycling

Recycling is strongly encouraged at any relevant Huntsman Scholar event. Student advocates are appointed to remind and help their fellow Scholars to recycle. Recyclables from 90 Scholars are channeled to recycling instead of to the landfill and those Scholars are reminded of the importance and ease of recycling.

## Highway 89 Cleanup

Every year, the Huntsman Scholars cleanup Highway 89 at the mouth of Logan Canyon. 90 students participate and gain an appreciation for the environment and keeping it clean. The Highway and surrounding area is maintained, giving drivers and recreators a chance to enjoy the clean scenery.

## Reusable Water Bottles

Each new Huntsman Scholar is issued with a reusable water bottle. This encourages the students to reduce waste from disposable water bottles. Each of the 90 students in the program have a water bottle, as well as those who have graduated the program in recent years.

## UN Global Compact

The Huntsman Scholars plan to increase their involvements in the UN Global Compact, which revolves around sustainability. The Compact tenants will be key in future education, service projects, research projects, and open forums. Scholars will learn how to implement sustainable practices in their future business endeavors.
