

## How to start your meeting: desktop Zoom app

1. Open the *Zoom* app.
2. Log in to your Zoom account.
3. Click the *Meetings* icon on the top of the application.

4. Select your meeting and click *Start* to start the meeting.

5. Once your meeting has concluded, you can click on the *End Meeting* icon on the bottom right corner of the Zoom app. This is important, as Zoom will not work properly if you try to start or attend a new meeting while you are still logged into an old one.
