

## How to use Host/Co-host controls

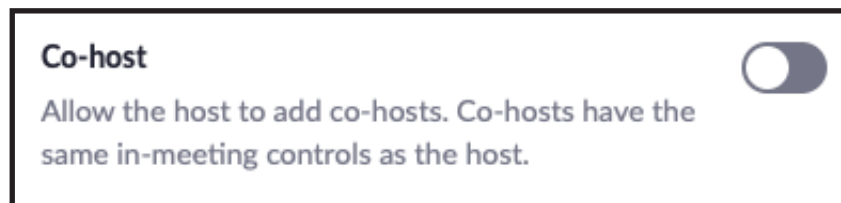

The co-host has the same in-meeting controls as the host, but can't start a meeting scheduled by the host.

### How to add a Co-host to a zoom meeting

1. To enable the Co-Host setting in the zoom, sign in to the zoom account in the zoom desktop client ([zoom.us](https://zoom.us)).
2. Select the *Settings* tab.

3. Scroll down the page until you find the *Co-host* option.

4. Toggle on the slider next to the *Co-host* option to enable the feature.
